## SS201

SS201 steel strip will be brighter, mechanical properties, corrosion resistance and flexibility are less, the price will be cheaper, SS201 has weak magnetic properties, will be magnetic after cold processing.

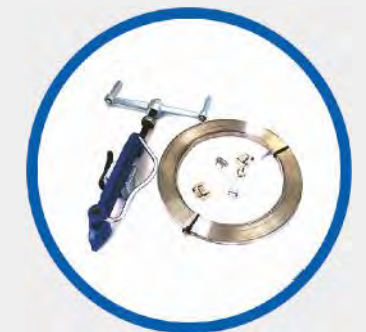

Parts No.	Material	Width		Thickness		Length m
		in	mm	in	mm	
CWB11438	SS201	1/4	6.4	0.015	0.38	25/30/50

SS304's mechanical properties, corrosion resistance and flexibility can be better than SS201, but the price is slightly more expensive, SS304 is slightly darker than SS201 after polishing, SS304 is not magnetic, it is not easy to rust.

## SS304

Parts No.	Material	Width		Thickness		Length m

## SS316

SS316 stainless steel, Its main characteristics are acid resistance and high temperature resistance. It has better resistance to chloride corrosion and better resistance to high temperatures than 304 stainless steel.

Self-locking stainless steel cable ties are designed for use in hostile environmental conditions. The high-grade steel resists breakdown from long-term exposure to temperature, chemical, radiation and other corrosive extremes. Use for fastening wrapping, pipes, cabling, poles, hoses and more.
